Target version:	Release 5.17			
Severity:	normal			

Description

For portals using the FSI viewer it was possible to store a default copyright statement in the FSI Server which has been displayed below the FSI viewer in the portal pages.

For a more general solution this data should preferably be stored in the CDM iteslef #9129 and so that is can be included in to the IIIF manifest as attribution to the sequence #0000

A interim solution we will anyway provide an option to enter the default copyright statement in the data portal, which will be shown below the image viewer.
