Are these still open issues. To me it looks like most of it is solved somehow. But maybe I do not understand some of the issue. Can you leave a message what is solved and what is still open?

I think the only thing still open, is the gap on top of the expandable element. I move this to 5.19 because it is not critical and at the moment I don't know how to reduce this gap.

This to me looks fine now. Maybe we could have a bit more space above "Related persons or teams if the "more" section is expanded, but this is a rare case and lowest priority.

Feel free to fix or close ticket.

If close, please move it back to 5.18
