Can we adapt single source layout according to nomenclatural source layout?

So we

- move External Link up and - by default - show it not in the "more" section.
- remove bold from External Link label
- Relabel External Link => Link or Link(s)
- do not use indentation for "more"
- remove bold from "more" (not sure if really required, please check what looks better, if possible at all)

Only NameInSource should stay where it is by default. This needs to be decided from case to case.

#13 - 11/25/2020 10:40 PM - Andreas Müller

... for TaxonNodes.source we should keep indentation of "more" as it is followed by "Related persons"

#14 - 11/26/2020 02:21 PM - Katja Luther

- Status changed from Feedback to Resolved

- Assignee changed from Katja Luther to Andreas Müller

I think this is fixed now. Please review.

#15 - 11/27/2020 08:14 AM - Andreas Müller

- Assignee changed from Andreas Müller to Katja Luther

Yes, this looks much better. Only for nom. sources "more" is still bold. Can you adapt it there, too?

#16 - 11/27/2020 08:17 AM - Andreas Müller

- Status changed from Resolved to Feedback

But it should be adapted for all single sources like for TaxonNode.source. So indentation is needed everywhere, except for nom. source where the

Section only contains source information (there we should not have indentation for "Detail" if we don't have for other elements.

#17 - 11/27/2020 08:20 AM - Andreas Müller

Another layout issue somehow related: In external link, can we move the URI to the top and the type below URI? URI is the most important. Also there could be some little space between URI and Type and the space to "Description" could be reduced a bit.

Applied in changeset taxeditor|69bed327b7a5028e5f904ffe9ac8cca1d01a20e9.

Sometimes the nomenclatural source still shows "No external link" yet instead of no protologue yet.

The space between URI and type (in external links could be a bit smaller and therefore a bit more space between type and description). But this is a minor issue.

It still shows up below ID Namesp and ID in Source for some reason. Did you forget to push?

#28 - 12/02/2020 04:28 PM - Andreas Müller

Also the NPE still exists, but with a different row number:

```

I entered ID Namespace here for a type desig which was completely empty except for the designation status

#29 - 12/02/2020 04:30 PM - Andreas Müller

... looks like the error appears at different places depending on the type field that you enter data in

this should be solved with last commit.

Now it appears also above Name in Source, but the order should be NameInSource, OriginalInformation, ID Namespace, ID in Source.

All other issues seem to be fixed. The new single sources look very nice now!!
