The annotations looks good, and the indices are placed correctly. Some cache issues in references are remaining, but this is not addressed here.

Question: We have an annotation type "Etymology" and I want to see for all entries 'Etymology:[blank] entered text.'  
Should I type in "Etymology: " in each annotation or can this be put in automatically (for this annotation type only)?

If this last issue is discussed, the ticket can be closed and released in the production data portal.
