

EDIT - bug #9210

invalid format string usage in MediaAutoInitializer

Target version:	Release 5.18	Found in Version:	
Severity:	normal		

Description

The format string as being used in

```
String.format(" LEFT JOIN FETCH %s.representations LEFT JOIN FETCH %s.titles r LEFT JOIN FETCH r.mediaRepresentationParts ", beanAlias)
```

refers to two arguments but only one is given.

This leads to exceptions in the AdvancedBeanInitializer (found in the cdm-vaadin test log)

```
15:36:40,479 ERROR AdvancedBeanInitializer:606 - java.util.MissingFormatArgumentException: Format specifier '%s'
```
