

EDIT - bug #9235

Footnote key for multiple cdm entities need to be rendered together

09/29/2020 04:49 PM - Andreas Kohlbecker

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Andreas Kohlbecker	% Done:	100%
Category:	cdm-dataportal	Estimated time:	0:00 hour
Target version:	Release 5.18	Found in Version:	
Severity:	critical		
Description			
<p>Currently footnote keys are created per cdm entity. When footnote keys are created for name and taxon they need to be joined. This however can hardly be achieved since the keys are enclosed into HTML tags for formatting and other purposes. Simple concatenation leads to awful appearance.</p> <p>Here as example <i>Nodosilinea sensensia</i> (integration reference db):</p> <p><i>Nodosilinea sensensia</i> (Blanco) Heidari & Hauer ex Lem, Nonsens species of the developers Vol1. 2001, comb. nov.^{1,2} [non <i>Nodosilinea sensensia</i>³ nec <i>Nodosilinea sensensia</i>⁴ nec <i>Nodosilinea blockensis</i>⁵ orth. var.⁶ <i>Nodosilinea sensensi</i>^{7,8}]</p> <p>see also:</p> <ul style="list-style-type: none">• <code>render_taxon_or_name()</code>: FIMXE close to end of function• cdm-dataportal 890f6c24
