Original Mail from WGB:

For Caryophyllales, two status types are missing: "Isonym" and "Later citation"; the former being an attempt or at least a supposed attempt to republish a name with the same type, the latter being names used with an ascribed authority different from the original one but actually including the same type [if they have been in use, the database needs to include them to avoid endless repetitions of the respective nomenclatural investigation).

For discussion on which status should be invalid designation and on correct ordering see #5794#note-23

History

#1 - 11/03/2020 11:07 AM - Andreas Müller

We still need (Latin) abbreviations for these two status types.

#5 - 11/06/2020 01:22 PM - Andreas Müller

- Subject changed from Add status isonym and later citation to nomenclatural status to Add missing nomenclatural status and name relationships

- Description updated

The situation has changed. Later isonym already exists as name relationship, not as status. At the same time there are additional status/name relationships missing mentioned in the above EDIT manual (from WGB) so I change the title of the ticket.
