

EDIT - bug #9281

Set basionym not available for heterotypic synonyms after drag & drop

Description			
mail ERS:			
beim Zusammenstellen von Synonymen in einer homotypischen Gruppe im Freitext-Editor ist es anschließend nicht sofort möglich, ein Basionym für diese Gruppe zu setzen. Auch nicht nach dem Speichern. Man muss das Taxon schließen und wieder öffnen, erst dann erscheint die Option wieder.			
Dagegen ist die Option interessanterweise sofort verfügbar, wenn man die homotypische Gruppe des akzeptierten Taxons verändert/erweitert. Es wäre komfortabel, wenn das auch bei Synonymen der Fall wäre.

Tested on rem_conf_am:

Created new heterotypic synonym by using right click menu, creating second heterotypic synonym and move it by d&d into the homotypic group of the first synonym. ->save -> use setAsBasionym in right click menu -> close and reopen the taxon (Bupleurum falcatum L.)

Creating a third synonym as synonym in homotypic group and use setAsBasionym, this also works.
