

EDIT - feature request #9287

Show term details in details view of term tree editor

11/09/2020 02:49 PM - Katja Luther

Status:	Closed	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	100%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.25		
Severity:	normal		
Description From ticket #8774 : Can we show the details of a term anyway even if it is not editable in the term tree editor. This is because the pure label is often not enough to decide if one took the right term. If not all information is easily available at least the most important should be shown. But ofcourse it should be disabled for editing. (but Maybe in future when vocabularies will also use term trees for hierarchy editing might be a requested feature, just in case this is important to know for implementation).

History

#1 - 11/09/2020 02:50 PM - Katja Luther

- Related to bug #8774: Reimplement term tree editors to implement the general save strategy added

#2 - 11/27/2020 08:55 AM - Andreas Müller

- Target version changed from Unassigned CDM tickets to Release 5.18

As this is related to [#8774](#) I move it to current milestone as we should implement it soon (might also be an interesting feature for the "integrated taxonomy" course).

#3 - 11/27/2020 09:09 AM - Andreas Müller

Maybe we do not need to load the data with the initial DTO but asynchronously when ever it is needed. Just in case loading takes to long for term types with a large number of term nodes.

#4 - 12/03/2020 08:33 PM - Andreas Müller

- Related to feature request #9337: Open issues for reimplementing of term tree editors added

#5 - 12/04/2020 09:03 AM - Katja Luther

- Target version changed from Release 5.18 to Release 5.19

#6 - 01/27/2021 04:44 PM - Andreas Müller

- % Done changed from 0 to 50

The buttons for multi-language editing are still enabled. So it is possible to remove a description for a given language or to open the the translation editor.

Note: Als the Open URI button is enabled even if no URI is given. It should be enabled only if a value exists (in general, not only in context of this ticket).

This is fixed now, please review.

The URI issue is fixed as well.

Works as expected now and we can close the ticket.

There is only one final issue which is valid for all disabled fields. Is it possible to generally make disabled fields copyable? Currently they only show the text but it is not possible to copy it. At some places this is already implemented. We probably should move this issue to a new ticket.

#14 - 06/29/2021 10:30 PM - Andreas Müller

See also [#7309#note-19](#) which is maybe related to this ticket.

It is possible and I implemented for toggleable and text fields, but now it is possible to enter something, but the changes disappear immediately.

Please have a look whether this is ok.

It works as expected for the fields in the term tree details view (which are not toggleable).

For toggleable they still set the dirty flag (tested on Person details view with bulk editor). This is unwanted.

I do not yet fully understand why it is not possible to use the same technique as for ordinary text fields in toggleable fields.

The same technique is used for text fields and toggleable text fields but maybe I need to have a look on the event handling of the toggleable text field.

As there is a followup ticket for the general "copyable" issue we can close this ticket and move discussion on "copyable" to [#9688](#)
