

EDIT - bug #9348

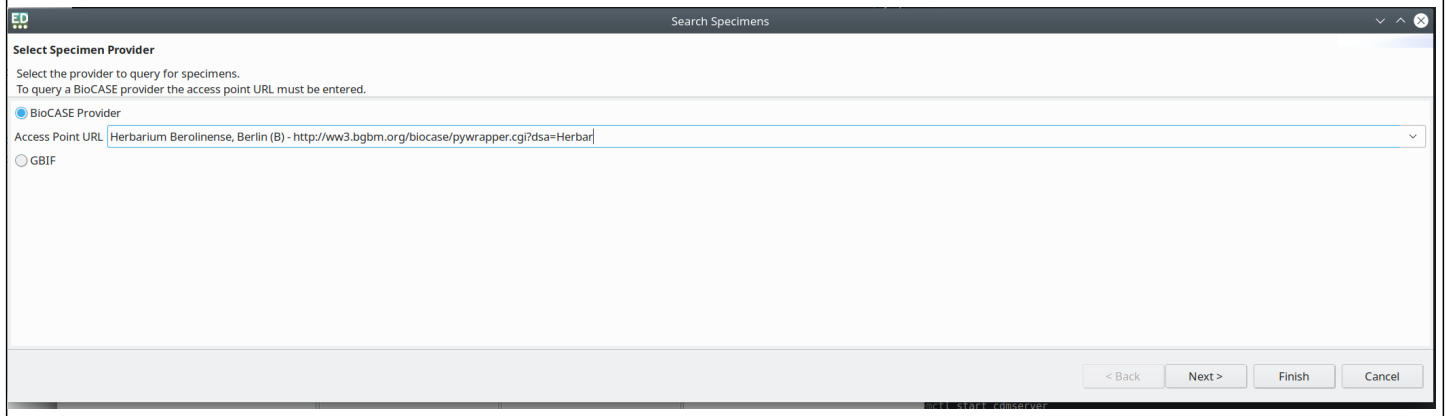

Specimen online import dialog issues

12/04/2020 03:50 PM - Andreas Kohlbecker

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Katja Luther	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		

Description

1. The dialog has extrem width (at least in the KDE desktop environment) this seems to come from the width of the combobox
2. Selecting an entry from the combobox suggestions adds the full label as URI.
3. When starting an import again, the dialog should check the last used option(BioCASE Provider or GBIF)
4. The label "BioCASE Provider" is not 100% correct, it should be "BioCASE" with a lowercase 'e'
5. The finish button makes not much sense here - should be hidden if possible
