ref #9350: fix is implemented in cdmlib therefore we can remove the workaround in taxeditor

#### History

##### #1 - 12/07/2020 12:15 PM - Katja Luther

implemented a workaround for hotfix 5.18.1 in editor, this should be removed for the next release. The correct fix comes with the next commit in cdmlib.

Works as expected.

Should we check after the release that the code merge worked correctly? Or should we close ticket immediately?

I think there is not much to review, on cdmlib side there was the missing setting of the publish flag (first commit) and the revert of the workaround on editor side, so I would close this ticket.
