Target version:	Release 5.45			
Severity:	normal		**Found in Version:**	

Description

follow up from #6315

1. ~~there is too much space between label "If no reference is chosen ... " and the checkboxes.~~ this should be fixed

2. Also if the dialog is resized this space changes and even the secundum selection disappears completely if the dialogue is too small. This should not happen.

3. ~~Also the description part has a line break even if there is still a lot of space on the right (not sure if this can be fixed as it is mayb SWT code)~~ we decided to keep it like it is because this is handled by rcp

- Target version changed from Release 5.19 to Release 5.21

#3 - 02/01/2021 09:22 AM - Katja Luther

- Status changed from New to In Progress

- % Done changed from 0 to 40

the space between the checkbox area and the text is reduced, the line break in the description part I was not able to adapt, this is handled in the TitleAreaDialog and there is a gap for a potential image but I did not find a way to reduce this gap.

This is hardcoded in TitleAreaDialog (see https://stackoverflow.com/questions/12528399/moving-an-image-of-a-titleareadialog-to-the-left) and the only way to change it, implement our ownn dialog class. This would be an extra ticket, if we want to have this for all dialogs.

#4 - 03/11/2021 08:51 AM - Katja Luther

- Target version changed from Release 5.21 to Release 5.22

#5 - 04/19/2021 02:31 PM - Katja Luther

- Status changed from In Progress to Feedback

- Assignee changed from Katja Luther to Andreas Müller

we should discuss if we want to remove the line break for all dialogs, then I create a new ticket for adaption of dialog implementation.

#9 - 05/12/2021 10:55 AM - Andreas Müller

- Description updated

- Assignee changed from Andreas Müller to Katja Luther

The line break is probably not so critical so I don't think we urgently need a self made dialogue. But I don't know how much work it is to implement on our own. If it is fast we may do it, otherwise not as there are more critical issues.

A bit more important is the fact that the dialogue can become so small that important information is not shown anymore (issue 2. from the description). Usually dialogues refuse to be shrinked too much (or at all).
