Target version:	Unassigned CDM tickets	Found in Version:	
Severity:	normal		
Description			
Sources of Descriptive Datasets are not yet shown in the Dataportal.			
"Derzeit werden alle Datasets gemerged und die Elemente unabhängig von ihrem Dataset sortiert. Jetzt müsste man für jedes Element die Quelle wiederholen. Soll grundsätzlich in dieser Weise mit Datasets umgegangen werden oder ist eventuell eine getrennte Darstellung per Dataset gewünscht?"

This is more or less a duplicate for [#7716](#). We should think about closing it as a duplicate. This is not true if we really decide to show data per description. But until now it was always discussed not to do it so.

So the correct implementation for description(dataset) related sources is, to virtually add them to each item as described in [#7716](#).
