EDIT - feature request #9508

OpenID Connect 1.0 authentication with ORCID

03/03/2021 05:54 PM - Andreas Kohlbecker

Status:	New		**Start date:**	
Priority:	Priority13		**Due date:**	
Assignee:	Andreas Müller		**% Done:**	0%
Category:	cdmlib		**Estimated time:**	0:00 hour
Target version:	Phycobank ready for submitters			
Severity:	normal			

Description
ORCID offers an OpenID Connect 1.0 (a simple identity layer on top of the OAuth 2.0 protocol) service which allows to use ORCIDs to authenticate users ORCID_AUTH_WITH_OPENID_CONNECT an example of using in Spring Boot application is also provided in the the ORCIF github repository: https://github.com/ORCID/orcid-openid-examples/blob/master/really-simple-orcid-oauth/src/main/java/org/orcid/simple/ReallySimple OrcidOauthApplication.java

This was an idea discussed with Andreas K. A good idea, but we postponed it.
Currently, I see in Vaadin just the fields "Username" and "Password", for Register just "Email", and for Password Recovery the field "Username /email address". I have no experience with authentification with ORCID, but I think this would be an interesting/good feature.
