

EDIT - bug #9583

Fix formatting of parent area in condensed distributions string if subareas have various status but at least 1 area has status native

04/16/2021 07:42 PM - Andreas Müller

Status:	Closed	Start date:	
Priority:	Highest	Due date:	
Assignee:	Andreas Müller	% Done:	100%
Category:	cdmlib	Estimated time:	0:00 hour
Target version:	Release 5.23	Found in Version:	
Severity:	normal		
Description This issue is described in #8297#note-15 and has not yet been handled there. Examples are Tu(A -E) or Ca(?C dF G H dL P T) . The main area should only be bold but never have a prefix in this case (according to ERS). An example taxon is Acanthus mollis: <ul style="list-style-type: none">http://test.e-taxonomy.eu/dataportal/preview/euromed/cdm_dataportal/taxon/d988b563-91a7-4346-a02b-0e6f45e1354fhttp://www.europlusmed.org/cdm_dataportal/taxon/d988b563-91a7-4346-a02b-0e6f45e1354f
