

EDIT - task #9594

Use MediaSpecimen as input for MediaSpecimenGeneralDetailElement

04/29/2021 04:19 PM - Andreas Müller

Status:	Closed	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Müller	% Done:	50%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.23		
Severity:	normal		
Description			
It does not make sense to use DerivedUnitFacade here as the specific type is known. Also it the facade creates problems as it injects the DerivedUnitFacadeCacheStrategy into the specimen so the new MediaSpecimenDefaultCacheStrategy can not really be used.

#4 - 04/29/2021 04:26 PM - Andreas Müller

we could do something similar for DnaSample

#5 - 04/29/2021 04:34 PM - Andreas Müller

Note: the implementation in specimen list editor leads to a message that the specimen can not be edited in details view. This is wanted as in the list editor always the full hierarchy should be editable including field unit data. This was not possible in the old implementation but the same view format appeared as in the specimen tree editor which is unexpected behavior.

#6 - 04/29/2021 09:57 PM - Andreas Müller

in DetailsViewE4.setInput() there is the following code:

```
if (input instanceof MediaSpecimen && !(this.activePart.getClass().getSimpleName().equals("BulkEditorE4"))){
```

This should better be "... this.activePart instanceof BulkEditorE4 " but the bulk editor class was not available here. Can this somehow be adapted to make BulkEditorE4 available. I did not check this.

This can be done by creating and using an interface. I will do this.

Implemented the interface and reviewed the mediaspecimen details view. This worked as expected, so we can close this ticket.
