This is implemented. However it does not work similar to MediaSpecimen as DnaSample somehow always gets the DerivedUnitFacadeCacheStrategy injected when data comes from the server.

This is probably because initDefaultCacheStrategy() does not fully work yet . It tries to solve the fact that also TissueSample uses DnaSample as class often and therefore the cache strategy can be defined only after setting basisOfRecord.

But this is only related to this issue. => [#5575#note-10](#)
