Severity:	normal		
Description			
copied from #9279			
Sources for MediaSpecimen should be formatted in the same way as elsewhere Example:			
<ul style="list-style-type: none">• Old non-conformant formatting: "... Germany, near Bughausen, A.Kohlbecker 81989, 2017 (holotype: [icon] p.33 in Kohlbecker, A. & Kusber, W.H. Algae of the BGBM (2008))"• expected formatting: "... Germany, near Bughausen, A.Kohlbecker 81989, 2017 (holotype: [icon] in Kohlbecker & Kusber 2008: 33)".

I adapted the formatting of MediaSpecimen type designations sources to the general source handling. This also allows handling the sources in the bibliography with footnotes and generally is more consistent.

So it does not look like "... Germany, near Bughausen, A.Kohlbecker 81989, 2017 (holotype: [icon] p.33 in Kohlbecker, A. & Kusber, W.H. Algae of

the BGBM (2008))" but like "... Germany, near Bughausen, A.Kohlbecker 81989, 2017 (holotype: [icon] in Kohlbecker & Kusber 2008: 33)".

Andreas K. and Henning, please review if you think this is correct.

Maybe tests in dataportal need to be adapted accordingly.

please can you clarify what the expected new output is?

I am assuming this representation in the new one "... Germany, near Bughausen, A.Kohlbecker 81989, 2017 (holotype: [icon] in Kohlbecker & Kusber 2008: 33)", correct?

Yes, the changes in TypeDesignationSetManagerTest can give you an idea of what changed.

Mostly it is "in Kohlbecker & Kusber 2008: 33" (new) instead of "p.33 in Kohlbecker, A. & Kusber, W.H. Algae of the BGBM (2008)" (old) . The prior uses our default formatting for sources.
