

EDIT - bug #9627

Handle updated objects correctly in monitored operations in taxeditor

05/19/2021 10:19 AM - Andreas Müller

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Müller	% Done:	0%
Category:	taxeditor	Estimated time:	0:00 hour
Target version:	Release 5.45	Found in Version:	
Severity:	normal		
Description			
Currently in AbstractUtility.executeMonitoredOperation() <pre>Set<Taxon> taxaToUpdate = getTaxaToUpdate(firstRemotingMonitor); updateNameEditors (taxaToUpdate);</pre> is called which updates only name editors and only if the result contains taxonBase. This is both not correct. All editors should be updated if data stored in them is involved. Also not only taxa should be checked but any data that might be part of the session of the corresponding editor. Also other long running tasks calling ProgressMonitorClientManager.pollMonitor should be handled the same way probably.
