

EDIT - bug #9630

Make the handling of computed description configurable

Description from #8471 : This ticket is not meant to completely make the computed descriptions invisible. By default they should only be disabled for editing. But ofcourse it might be even better if this can be made configurable (e.g. 3 states: editable, disabled for editing, invisible) with default to disabled for editing.

When selection is "Enabled" the supplemental data and the sources are still disabled. Tested with rem_conf_am/->Species "Testaggregation species"->Germany
Enablement works ok for area and status and timescope

#6 - 06/01/2021 10:04 AM - Andreas Müller

When "disabled" is selected, timescope is still editable (I have only checked distributions no other descriptions)

#7 - 06/01/2021 10:05 AM - Andreas Müller

"Invisible" works as expected

The detail fields in timescope are still editable with "disabled"

#11 - 06/01/2021 02:30 PM - Andreas Müller

And supplemental data of *not*-computed data are not editable with "disabled"

In my local installation the fields are not greyed, but they are not editable, have to check it with nightly.

Have you tested with an empty field? Be aware that the fields have a maximum number of digits that can be entered.

- *Tags set to additivity*

- *Status changed from Feedback to Resolved*

- *% Done changed from 50 to 80*

Works now as expected for distributions but needs to be tested for structured descriptions (open new ticket if necessary).

Code still needs to be cleanup (lot of commented code)

#17 - 06/02/2021 11:32 AM - Katja Luther

- *Status changed from Resolved to Closed*

Code is cleaned up. I check the structured descriptions and create a new ticket if necessary.

#18 - 09/30/2021 02:03 PM - Katja Luther

Added check whether a d&d target is a computed description.
