Severity:	normal		

Description

mail WB:

Hallo,
es geht um die Eingabe eines MAN mit dem gleichen Namen wie ein bereits bestehender MAN (derzeit ist das häufig notwendig, da man ja nur eine Referenz als sensu eingeben kann).
Im Name Editor tippe ich Enter, suche dann den Namen im Details view heraus, speichere das und erkläre dann das Synonym zum MAN.

The screenshot shows a window with several tabs: 'Euploca fruticosa (L.)...', 'Myriopus poliochros (...)', and 'Myriopus volubilis (L.)...'. The main area displays a list of synonyms for 'Myriopus volubilis (L.) Small'. The list includes 'Tournefortia volubilis L.', 'Tournefortia barbadensis N. E. Br. ex Britton', 'Tournefortia leonis Britton & P. Wilson', 'Tournefortia minuta Bertero ex Spreng.', 'Tournefortia oblongata Urb. & Ekman', 'Tournefortia picardae Urb.', 'Tournefortia trinitatis L. Riley', and 'Tournefortia ferruginea'. The 'Tournefortia ferruginea' entry is highlighted in blue. Below it, a purple icon indicates a synonym: 'Tournefortia ferruginea - SENSU GRISEBACH 1866, ERR. SEC. GREUTER & RANKIN RODRÍGUEZ 2017'. The right-hand side shows the 'Details' view for 'Tournefortia ferruginea'. It includes fields for 'Title Cache' (Tournefortia ferruginea syn. sec. Greuter & Rankin Rodríguez 2016), 'Appended Phrase' (Secundum Greuter, W. & Rankin Rodríguez, R. 2016: The Spermatophyta of Cu...), and 'Detail'. There are also checkboxes for 'Exclude Authorship', 'Synonym is doubtful', and 'Synonym is published' (checked). The 'Name' section shows 'Name Cache' (Tournefortia ferruginea) and 'Rank' (Species).

Dann springt der Details View auf die Details des anderen angegebenen MANs

The screenshot shows the same window as above, but the 'Details' view is now for 'Tournefortia ferruginea sensu Grisebach 1866'. The 'Name' section is expanded to show 'is misapplied name'. Below this, it says 'Taxon: Tournefortia ferruginea sensu Grisebach 1866' and 'The Taxon is referenced by 1 other object(s), if you change it, it is changed for all these objects'. The 'Title Cache' is 'Tournefortia ferruginea sensu Grisebach 1866'. There is a checkbox for 'Original Taxon Doubtful' which is unchecked. The 'Appended Phrase' section is expanded to show 'Published' (checked) and 'Sensu' (Grisebach, A. H. R. 1866: Catalogus Plantarum Cubensium, exhibens collectionem Wrightianam aliasque minores ex insula Cuba missas, quas recensuit A. Grisebach). The 'Detail' section shows 'Misapplication Type' (is misapplied name for) and 'Misappl. Sec.' (Greuter, W. & Rankin Rodríguez, R. 2017: Plantas vasculares de Cuba: inventario p Segunda). There are also checkboxes for 'Link(s)', 'more', and 'Misapplication Doubtful' (unchecked). The 'Name' section is collapsed to 'Name: Tournefortia ferruginea'.

Revision 1b62813b - 06/08/2021 11:40 AM - Katja Luther

History

#1 - 06/08/2021 11:39 AM - Katja Luther

- Status changed from *New* to *Resolved*
- % Done changed from 0 to 50

Applied in changeset [taxeditor|1b62813be8ba0f6f5cde2384147c62f0c913f1b6](#).

#2 - 06/08/2021 11:44 AM - Katja Luther

- Category set to *taxeditor*
- Assignee set to *Andreas Müller*
- Target version changed from *Unassigned CDM tickets* to *Release 5.25*

This problem was caused by setting the focus everytime the name editor is refreshed and all containers are redrawn. Maybe this also can be optimised to only redraw the selected container, but this is another ticket, sometimes the order of the containers will change therefore the complete redraw is needed (for example when changing a MAN into synonym)

Please review.

#3 - 06/25/2021 07:08 PM - Andreas Müller

- Status changed from *Resolved* to *Closed*
- Assignee changed from *Andreas Müller* to *Katja Luther*
- % Done changed from 50 to 100

Seem to work as expected (but not sure if I could reproduce it correctly)
