<b>Target version:</b>	Release 5.25		
<b>Severity:</b>	normal		
<b>Description</b>			
Gymnocalycium saglionis (Cels) Britton & Rose, Cactaceae 3: 157. 1922 [Original spelling of epithet should be maintained. ]A irgendwie fände ich es besser, wenn die Referenz-Fußnote in der eckigen Klammer stehen würde. <a href="http://caryophyllales.org/cactaceae/cdm_dataportal/taxon/73560e8a-aecf-4326-90b2-4ed7bf7ecec2">http://caryophyllales.org/cactaceae/cdm_dataportal/taxon/73560e8a-aecf-4326-90b2-4ed7bf7ecec2</a> Was passiert eigentlich, wenn es mehrere Notes gibt? Mehrere eckige Klammern? Wenn da konkateniert würde (was schöner wäre), müsste die Referenz ja in die Klammer.

Revert "ref #9674 removing dot"

This reverts commit 591f74e183942f552e78098a794fc4bd20ba4824.

removing the dot raises 15 errors in the selenium tests, needs discussion!

Applied in changeset [cdm-dataportal|c4dd76b64df4d09297b4335ac55be13e01833734](https://cdm-dataportal.org/c4dd76b64df4d09297b4335ac55be13e01833734).

##### #2 - 06/16/2021 03:45 PM - Andreas Müller

Aber das original spelling wird hier nicht mit ausgegeben: as „saglione“ – kann man das einstellen? In CDM-light kommt's wohl raus.

This part of the description does not seem to be handled in this ticket, so maybe we should remove it from the description? Otherwise you find this ticket erroneously when searching for original spelling issues.

**#3 - 06/16/2021 04:45 PM - Andreas Kohlbecker**

- Description updated

thanks for that hint.

**#4 - 06/16/2021 05:03 PM - Andreas Müller**

- File picture939-1.png added

On the linked site above there is also an unnecessary whitespace before the closing bracket and a full stop after footnote key before "sec." . These should also be removed if not yet done:

maintained .sec.

**#5 - 07/14/2021 06:13 PM - Andreas Kohlbecker**

This is the link to the according test-server portal page

[http://test.e-taxonomy.eu/dataportal/preview/caryophyllales\\_spp/cdm\\_dataportal/taxon/73560e8a-aecf-4326-90b2-4ed7bf7ecec2](http://test.e-taxonomy.eu/dataportal/preview/caryophyllales_spp/cdm_dataportal/taxon/73560e8a-aecf-4326-90b2-4ed7bf7ecec2)

I removed the space by trimming the description element text.

The dot at the end of the string needs more careful consideration as it seems if this could have been a requirement in some situations. Removing the dot raises 15 errors in the selenium test. The need to release very soon does not allow to care for this now.

The request referenced in comment 2 seems to be misplaced since i can't find this text in the ticket description:

Aber das original spelling wird hier nicht mit ausgegeben: as „saglione“ – kann man das einstellen? In CDM-light kommt's wohl raus.

So I am closing this issue now, please open a new ticket for the dot-issue if needed.

It is not misplaced but deleted (by yourself in [#note-3](#) as requested).

Are we talking here about the dot after the end-bracket or before the footnote/at the end of the string. The later should stay, I agree. But I was talking about the dot after the bracket. This is not needed as normally synonymy entries do not end with a dot and also before "sec." you never have a dot.

**#9 - 07/14/2021 06:37 PM - Andreas Müller**

By the way, the test portal puts the note to the end while on production it is before sec which makes the situation worse and definitely wrong

**#10 - 07/15/2021 07:47 AM - Andreas Kohlbecker**
