Search in bulk editor does not yet include search on collector titlecache

**#5 - 07/01/2021 09:33 AM - Andreas Müller**

- File picture865-1.png added

The search result in search dialog does not yet include the collector title cache

This is from a search for a nomenclatural author.

For a search for a bibliographic author currently only the titlecache (but not the nom.titlecache and not the collector titlecache is shown). I think we should add them (at position 2 and 3) as this is often an important information if one wants to distinguish records that are duplicates titlecache wise.

**#6 - 07/01/2021 09:42 AM - Andreas Müller**

Searching for a collector (from FieldUnit details view) does also not yet give a result for searching on collector titlecache

Also the collector title is shown at 3. position when searching for a gathering collector but should be shown at first position.

**#10 - 07/06/2021 02:09 PM - Andreas Müller**

The column "collector titlecache" seems to show the collector title not the collector titleCache. At least for Person.  
This needs to be adapted.
