

EDIT - feature request #9694

Validation Framework light

07/05/2021 02:01 PM - Andreas Müller

Status:	New	Start date:	
Priority:	New	Due date:	
Assignee:	Andreas Müller	% Done:	0%
Category:	cdmlib	Estimated time:	0:00 hour
Target version:	Release 5.46		
Severity:	normal		

Description

Until the full validation framework is available we could implement a script that can be run against a DB which does at least level 2 validation for the most important classes. This way we may find many incorrect data already and the validation rules can already be improved.

In a next step running the script could be integrated into the TaxEditor similar to the cache update scripts.
