Severity:	normal		

Description

The screenshot shows a 'Preferences' dialog box with a tree view on the left and a main content area. The tree view is expanded to 'Status'. The main content area has a title 'Status' and a description: 'List of preferences defining available status per area. With the mostright button you can edit the selected area specific status preference. For defining new area specific status preference please use the button below the table'. Below the text is a table with columns: Predicate, Subject, Values, Override all, Delete, Status. Below the table is a 'Status Selection' button. A pink callout points to the 'Status Selection' button with the text 'content lost!'. At the bottom of the dialog are buttons for 'Restore Defaults', 'Apply', 'OK', and 'Cancel'.
