

## EDIT - bug #9734

### Correct handling for secundum references when moving taxon to new parent

08/05/2021 11:52 AM - Katja Luther

| <b>Description</b>  |              |                          |           |
| For the move of a synonym to a taxon and a taxon to a synonym we already implemented the handling of secundum references, but for moving a taxon to a new parent it is still missing. |              |                          |           |

#### History

##### #1 - 08/05/2021 11:53 AM - Katja Luther

- Related to feature request #9340: Workflow support for secundum handling when making synonym a new accepted taxon added

##### #2 - 08/12/2021 01:47 PM - Katja Luther

- Status changed from New to Resolved

- Assignee changed from Katja Luther to Andreas Müller

- % Done changed from 0 to 60

This is handled like change synonym to accepted taxon and accepted taxon to synonym (not swap), please review.

##### #3 - 09/20/2021 10:18 PM - Andreas Müller

- Status changed from Resolved to Feedback

- Assignee changed from Andreas Müller to Katja Luther

This did not work for me. I did select "Keep if all related secs are the same, warn otherwise". I moved a taxon with sec. A and old parent sec. A to a new parent with sec. B. => no warning and the moved taxon kept its sec.

**#4 - 09/20/2021 10:19 PM - Andreas Müller**

Can you please test all possible combinations on nightly and put the result of the test into this ticket?

**#5 - 09/21/2021 02:18 PM - Andreas Müller**

- Target version changed from Release 5.45 to Release 5.27

**#6 - 09/22/2021 11:20 AM - Katja Luther**

Tested locally (test server is unavailable):

pref: keepOrWarn

- if the secs the same -> ok
- if secs different -> warning, but secs kept

pref: keepOrSelect

- secs are all the same -> ok
- secs are different -> dialog to choose how to handle the sec

pref: always select

- secs are the same -> dialog
- secs are different -> dialog

pref: always delete sec

- sec of the moved taxon is always removed

pref: always use parent sec

- sec are the same -> sec is kept
- secs are different -> moved taxon gets sec of the parent

**#7 - 09/22/2021 11:29 AM - Katja Luther**

- Status changed from Feedback to Resolved

I will test again with nightly when the test server is available again

**#8 - 09/22/2021 03:10 PM - Katja Luther**

- Assignee changed from Katja Luther to Andreas Müller

**#9 - 09/22/2021 06:13 PM - Andreas Müller**

- Tags set to editorial\_workflow

- Status changed from Resolved to Closed

- Assignee changed from Andreas Müller to Katja Luther

- % Done changed from 60 to 100

Works as expected now
