The current db preferences menu only shows "multi-language support" but not "languages for common names". Something still seems to be missing.

Maybe the editor was not build?

I checked the nightly build and the common name languages where available for DB preferences:

Now it exists, but when saving I got:

#### #8 - 09/01/2021 09:56 AM - Katja Luther

This exception comes from the multilanguage preference, but needs to be fixed as well.

#### #9 - 09/19/2021 10:01 PM - Andreas Müller

Is this fixed already?

#### #10 - 09/20/2021 09:19 AM - Katja Luther

```

I don't know if this is related to this ticket.
