| <b>Target version:</b>   | Unassigned CDM tickets | <b>Found in Version:</b> |            |
| <b>Severity:</b>   | normal                 |                          |            |
| <b>Description</b>   |                        |                          |            |
| <p>Implement the details view again to be able to edit some more advanced data like the modifiers. This worked in earlier versions but was removed by PP when implementing a faster version. As we already handle some DTOs in details view I don't think it should be too difficult to reenale it.</p> <p>This worked because the descriptions where used as cdm objects, actually they are only dtos and therefore we have to adapt the dtos in a way the modifiers, sources etc. are available.</p> |                        |                          |            |
