Target version:	Release 5.46		
Severity:	normal		
Description			
in #6636 and #9786 the most important tags for RIS import have been implemented. However, there are a couple of more not yet implemented tags and tasks.			
Also check if deduplication works for authors and references (#9889).			
Also check the console output for the test with the long file. There are issues with date handling that could be improved.			
Also we may want to add the source reference to newly added authors. 5.29			
The reference detail for the source reference is something like "line line 1 – line 16". The first "line" should be removed. 5.29			
Include new authors in result. 5.29

NaK:

Nur bei Book Chapters funktioniert der Import nur teilweise, dafür muss man ja das Buch separat anlegen und dann das Chapter. Aber für normale Bücher und Journals funktioniert der Import problemlos und man muss vor allem keine Teams manuell anlegen, die werden korrekt importiert.
