Target version:			
Severity:	normal		
Description In all/most poms json-lib has a classifier <classifier>jdk15</classifier> It is unclear/not documented why this is needed. We should try to remove. If this is not possible the classifier should be documented.

I did some research. json-lib on maven central is only available as json-lib-2.4-jdk15.jar and json-lib-2.4-jdk13.jar. json-lib-2.4.jar does not exist. So for being able to download json-lib via maven the classifier is necessary.
I added according documentation to the poms.
