Die Idee war, unter den Authors eine Liste für IPNI anzulegen, die die abarbeiten (ich sehe schwarz, dass die das machen).			
Können wir nicht auf „publish to IPNI“ or „publish“ selektieren. Dann hätten wir eine Auswahl geprüfter Authors, auch solcher, die schon in IPNI sind.			
Und dann eventuell eine Seite pro Buchstabe oder alles untereinander und maximal 20, 50? anzeigen, oder wie es am Besten geht.			
Dazu noch mal eine Frage: Wo soll die IPNI-ID eingegeben werden?			
Bei „Kusber“ gab es 3 Möglichkeiten:			
<ul style="list-style-type: none">• LSID unter dem Namen• Zusatzdaten /Source/ Reference IPNI / Id in Source• Zusatzdaten / Identifiers / Type / IPNI Author identifier / Identifier (value) <-- recommended for manually entered data			
MarkerTypes:			
<ul style="list-style-type: none">• publish: 0522c2b3-b21c-400c-80fc-a251c3501dbc• publish to IPNI: c7cc1bcc-7e72-4ed5-8dba-e204363056a4

I created a non public page in the phycobank site which lists both search modes for agents: https://www.phycobank.org/author_lists

Now that [#9929](#) is solved the feature requested here works as expected.
