

EDIT - bug #9980

Implement a checkbox to distinguish between export the whole subtree or only the selected node

03/16/2022 02:24 PM - Katja Luther

Status:	New	Start date:

Severity:	normal		
Description			
from #6800 the subtree filter should be available now, please review. To filter on taxa, you have to click on taxonnodes without children. if it should also be possible to export only the parents of a subtree, we need to add a checkbox in the wizard that only the selected taxonnodes without their children should be exported. The checkbox has to be implemented.
