Description			
In the Mexico Eflora we have lots of common names that differ only by area (but not in name and language). To better distinguish these we should show the area in the common name label in the facts view like "Name (Language, Area)"

- Start date changed from 03/21/2022 to 03/17/2022

We should discuss how to format this and whether it should be configurable.

The first implementation looks like this:

If everything is available: Name (Language, Area)  
if only the language is available: Name (Language, No area provided)  
if only the area is provided: Name (No language provided, area)  
if only the name is provided it would look like this : Name(No language provided, No area provided)

- Status changed from New to In Progress

Personally I don't think we need the "No xxx provided" parts. I prefer labels as simple as possible. If someone wonders why the language and/or area information is missing he/she can go to the details view and will find the explanation.

**#5 - 03/17/2022 01:52 PM - Andreas Müller**
